

RESEARCH SUMMARY

The Horse Trust & Horserace Betting Levy Board

Strangles Vaccine

- CVMP, of the European Medicines Agency, have recommended Strangvac for use in horses
- The UK now operates through a separate procedure and we remain on track to receive a positive opinion from the VMD by the end of July
- The S. equi genome sequencing data was generated from funding from the Horse Trust, and this informed the design of Strangvac

RESEARCH & GRANTS

Funding update

THE HORSE TRUST FUNDED PROJECTS SINCE 2014

YEAR	RESEARCH GRANTS	PhDs	OTHER	VALUE
2014	2	2		£427,400
2015	2	6		£736,382
2016	1	3		£519,417
2017	3	2	3	£723,387
2018	1	3		£440,868
2019	3	1	2	£575,449
2020	0	1	1	£116,000

Funding & Projects 2021

Grant Funding

- Osteoarthritis
- Disease modelling
- Back movement
- Pain expression & emotional states
- Adaptive learning
- Mycotoxin ingestion
- Bacteraemia

Projects

- Advancing Equine Scientific Excellence (managed by World Horse Welfare) - Datasets sharing project between industry and undergraduates
- Advancing Equine Scientific Excellence – Student Quality of Life project
- Happy Equine Athlete Workshop – Animal Welfare Research Network
